

CZAR ERSON S. ISLA

Santiago City, Isabela | +63 969 295 4102 | islaczarerson@gmail.com

LinkedIn: <https://www.linkedin.com/in/czar-erson-isla-b689b0274/>

Portfolio: <https://han-zei.github.io/>

PROFESSIONAL SUMMARY

Computer Science graduate with experience in data analysis, forecasting, and backend development. Skilled in Python, Pandas, ARIMA, and Prophet, with hands-on experience building predictive models and interactive dashboards. Delivered data-driven solutions through academic and real-world projects. Strong analytical mindset with a passion for transforming data into actionable insights.

TECHNICAL SKILLS AND QUALIFICATIONS

Data Analysis: Data Cleaning, Preprocessing, EDA, Insight Generation

Statistical Modeling: Regression Analysis, Time Series Forecasting (ARIMA, Prophet)

Programming: Python (Pandas, NumPy)

Databases: PostgreSQL (Basic), SQL

Data Visualization: Power BI, Excel

Tools: GitHub, Grafana, Google Sheets

Platforms: Salesforce

WORK EXPERIENCE

Software Engineer Intern

Company: Amdocs Philippines

Duration: April – July 2025

- Assisted in configuring monitoring alerts within Amdocs' Pay2Reload system by using PostgreSQL for alert data storage and Grafana dashboards, applying the Four Golden Signals (latency, traffic, errors, saturation) under senior supervision to support system observability.

Government Intern (GIP)

Company: Public Employment Service Office

Duration: August 2023 – August 2024

- Performed data cleaning, organization, and validation of CHED-TPD scholar records under the Government Internship Program for Santiago City, ensuring accuracy and consistency of official education datasets while reporting progress to a supervising officer.

EDUCATION

Bachelor of Science in Computer Science

August 2021 – July 23, 2025

Major in Data Mining

Academic Achiever with GWA of 1.60

PROJECTS

Accident Prone Area Prediction for Pro-active Intervention

- Developed a time-series forecasting model using ARIMA and Facebook Prophet to predict accident-prone areas for proactive intervention across 37 barangays in Santiago City.
- Performed data cleaning, digitization, and preprocessing of raw datasets to prepare inputs for modeling.
- Supported data-driven decision-making for patrol and intervention planning through predictive analytics outputs.

Four Golden Signals Monitoring Dashboard (Grafana)

- Designed and supported Grafana-based observability dashboards using **PostgreSQL queries** to analyze Pay2Reload service workflows, focusing on latency, traffic, error rates, and system saturation (Four Golden Signals).

QR-Based Attendance System (Deployed Web Application)

- Developed a full-stack QR-based attendance management system using PHP, MySQL, HTML, CSS, and JavaScript to automate attendance tracking and record management.
- Implemented QR code scanning authentication workflow to improve speed and accuracy of attendance logging.
- Deployed the application on Render, enabling online access and real-time usage for end users.

CERTIFICATIONS AND SEMINARS

AI / Machine Learning / Data Science

- Machine Learning for Absolute Beginners – Udemy – July 2025
- CHED LAKAS AI-NLP Workshop – National University - September 25 – 27, 2023
- ASEAN Data Science Explorers – SAP Analytics and SAP Build Apps – College of Computing Studies, Information and Communication Technology (CCSICT), Isabela State University, Echague, Isabela - May 31, 2024

DevOps / Cloud / Observability

- The DevOps Essential - Udemy - July 2025
- Grafana Beginner to Advanced Crash Course – Udemy – July 2025

Development Tools & AI Coding

- GitHub Copilot Beginner to Pro – Udemy – June 2025

AI Ethics

- ChatGPT / AI: Ethical Intelligence – Udemy – June 2025

Conferences & Research

- TRUE Icon 2024 – Paper Presenter
